

ANKIT KUMAR

Full Stack Developer | AWS Cloud, DevOps Automation & Linux Specialist

📍 Greater Noida / Noida, Uttar Pradesh, India | 📞 +91 9162023903 | ✉️ as3000610@gmail.com
| 🔗 linkedin.com/in/ankit-kumar8582 | 💻 github.com/ankit8582

PROFESSIONAL SUMMARY

Highly motivated and results-oriented **MCA postgraduate student at NIET** with strong technical expertise in **Full-Stack Web Development (MERN Stack)**, **AWS Cloud Infrastructure**, **DevOps Automation**, and **Linux Administration**. Proficient in engineering responsive frontends with **React.js**, architecting scalable RESTful APIs with **Node.js & Express.js**, and managing databases with **MySQL & MongoDB**. Hands-on experience deploying and automating web applications on **AWS EC2 (Ubuntu Linux)** using **Nginx Reverse Proxy**, **PM2**, and custom **VPC networking architectures**. Dedicated problem solver passionate about building scalable, secure, and production-ready applications.

EDUCATION

Master of Computer Applications (MCA)

Noida Institute of Engineering and Technology (NIET), Greater Noida, Uttar Pradesh

2024 – 2026

GPA: 7.6 / 10

Bachelor of Computer Applications (BCA)

Babasaheb Bhimrao Ambedkar Bihar University (BRABU), Muzaffarpur, Bihar

2020 – 2023

Score: 72.08% (Distinction)

TECHNICAL SKILLS

- **Programming Languages:** Java (Core & OOPs), Python, JavaScript (ES6+), C, SQL
- **Full Stack & Web Tech:** React.js, Node.js, Express.js, HTML5, CSS3, Tailwind CSS, Bootstrap, RESTful APIs, JSON
- **Databases:** MySQL, MongoDB (Mongoose ODM), Relational Database Design, CRUD Operations, Indexing, Schema Validation
- **Cloud Infrastructure (AWS):** Amazon EC2, S3 (Static Hosting & Storage), RDS (MySQL), VPC, IAM Roles & Policies, Security Groups, Route 53, Elastic IP
- **Networking & Protocols:** VPC Architecture, Subnets (Public/Private), CIDR, Internet Gateway, NAT Gateway, Route Tables, TCP/IP, DNS, SSH, HTTP/HTTPS
- **Linux & DevOps Tools:** Linux Administration (Ubuntu), Bash Shell Scripting, File Permissions & Users (chmod, chown, useradd, groupadd), Nginx (Reverse Proxy), PM2, Git, GitHub, VS Code, Postman
- **Core CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming (OOPs), Computer Networks, Operating Systems, DBMS

KEY PROJECTS

1. TeamTaskOps – Full Stack Application Deployment & DevOps Automation on AWS

[AWS EC2, Linux, Networking, Git & GitHub,
Nginx, Node.js, React.js, MongoDB]

- Engineered and deployed a production-grade full-stack MERN application on AWS EC2 (Ubuntu Linux) with Nginx configured as a reverse proxy.
- Designed isolated cloud networking using custom VPC, public/private subnets, Security Groups, and Elastic IP for secure backend API and database access.
- Automated server setup, dependency installations, and process management using Linux Bash scripts and PM2 for zero-downtime execution.
- Integrated Git & GitHub version control workflows with continuous deployment pipelines, streamlining code delivery to live cloud environments.

2. AWS 3-Tier Enterprise Web Application & Cloud Infrastructure

[AWS EC2, VPC, Nginx Reverse Proxy, MySQL RDS,
S3, Linux Bash]

- Architected and deployed a multi-tier web application architecture on AWS EC2 (Ubuntu Linux) fronted with Nginx Reverse Proxy for load distribution.
- Designed custom AWS VPC with isolated Public and Private Subnets across availability zones, configuring Internet Gateway (IGW) and least-privilege Security Groups.
- Configured Amazon S3 for centralized cloud media uploads and Amazon RDS MySQL for secure relational data storage.
- Automated server initialization and dependency setup via Linux UserData Bash scripts.

3. Online Course Management & Full-Stack Learning Platform

[React.js, Node.js, Express.js, MongoDB, JWT,
Tailwind CSS]

- Engineered an end-to-end full-stack educational web platform designed to host, manage, and deliver interactive courses to students and professionals.
- Implemented Role-Based Access Control (RBAC) with tailored portals and dashboards for Admin, Instructor, and Student.
- Integrated course tracking, live class scheduling, media management, and secure token-based JWT authentication.
- Engineered scalable backend RESTful APIs using Express.js and structured MongoDB schemas with Mongoose ODM validation.

4. Team Task Manager (Collaborative Project Workflow Platform)

[React.js, Node.js, Express.js, MongoDB, JWT,
Tailwind CSS]

- Developed a collaborative MERN stack project management application to assign, organize, and monitor team tasks and milestones in real time.
- Implemented interactive task boards (To-Do, In-Progress, Completed), priority tagging, due-date reminders, and team activity logs.
- Integrated secure JWT authentication and role-based access control for Project Managers and Team Members.

5. Digital Menu Card (Digi-Menu Card)

[HTML5, CSS3, JavaScript, QR Code Integration, Responsive
UI]

- Designed and developed a responsive digital menu application accessible via QR code scan on mobile and desktop browsers.
- Engineered seamless category filtering, intuitive touch-friendly navigation, and zero-dependency fast page loading for dining customers.

CERTIFICATIONS & PROFESSIONAL STRENGTHS

- ▶ **Java Concepts Certification** — Infosys Springboard
- ▶ **Full Stack MERN Web Development** — Specialized Coursework
- ▶ **Core Strengths:** Problem Solving, Agile Collaboration, Time Management
- ▶ **TechA Web Designing Foundation Certification** — Infosys Springboard
- ▶ **AWS Cloud Foundations & Linux Networking** — Practical Training
- ▶ **DevOps Practices:** CI/CD Workflows, Infrastructure Automation, Reverse Proxy Config
